ARTICLE II: LAND USE REGULATIONS

Section 98-201 Purpose

The purpose of this Article is to indicate which land uses may locate in each zoning district and under what requirements; and which land uses may not locate therein. A further distinction is made for land uses which may locate in a given district only upon obtaining a conditional or temporary use permit to do so. Finally, certain land uses may locate in a given district as a matter of right upon compliance with special regulations for such a land use.

Section 98-202 Interpretation of Land Use Tables

(1) The land uses listed in Sections 98-202 (Table of Land Uses) and 98-204 (Table of Land Uses Permitted in Permanently Protected Green Space Areas) are specifically designated and refer to the detailed listing of land uses contained in Section 98-206 (Detailed Land Use Descriptions and Regulations).

(2) Land Uses Permitted by Right: Land uses listed as permitted by right (designated as a “P” in Sections 98-203 and 98-204) are permitted per the general land use requirements of this Chapter (Section 98-205); per the general requirements of the specific zoning district in which they are located; per any additional requirements imposed by applicable overlay zoning districts as designated on the Official Zoning Map; per the general requirements of this Chapter including Section 98-908; and per any and all other applicable City, County, State, and Federal regulations.

(4) Land Uses Permitted as a Conditional Use:

(a) Land uses listed as permitted as a conditional uses (designated as a “C” in Sections 98-203 and 98-204) are permitted subject to all the requirements applicable to uses permitted by right as listed in Subsection (2), above, plus any additional requirements applicable to that particular land use as contained in Section 98-206 (Detailed Land Use Descriptions and Regulations), including any additional requirements imposed as part of the conditional use review process. Each application for, and instance of, a conditional use shall be considered a unique situation and shall not be construed as precedence for similar requests (See also Section 98-905).

(5) Land Uses Permitted as an Accessory Use: Land uses permitted as an accessory use are permitted subject to all the requirements applicable to uses permitted by right as listed in Subsection (2), above, plus any additional requirements applicable to that particular land use as contained in Section 98-206 (Detailed Land Use Descriptions and Regulations).

(6) Land Uses Permitted as a Temporary Use: Land uses listed as permitted as temporary use (designated as a “T” in Sections 98-203 and 98-204) are permitted subject to all the requirements applicable to uses permitted by right as listed in Subsection (2), above, plus any additional requirements applicable to that particular land use as contained in Section 98-206(9) (Detailed Land Use Descriptions and Regulations). (See also Section 98-906).

(7) Land uses for which a blank space is shown for a specific zoning district are not permitted in such zoning district, except as legal nonconforming uses (Section 98-207).
(8) Although a land use may be indicated as permitted by right or permitted as a conditional use in a particular district, it does not follow that such a land use is permitted or permissible on every parcel in such district. No land use is permitted or permissible on a parcel unless it can be located thereon in full compliance with all of the standards and regulations of this Chapter which are applicable to the specific land use and parcel in question, or unless an appropriate variance has been granted pursuant to Section 98-910.

**Section 98-203 Tables of Land Uses**

This Chapter regulates the location of land uses to specific zoning districts through the use of the Tables of Land Uses contained in this Section (See the following pages for Tables).

Section 98-204 Table of Land Uses Permitted in Permanently Protected Green Space Areas

In all developments, certain areas may be required to be set aside as permanently protected green space for the purpose of natural resources protection, to meet a Minimum Green Space Ratio (GSR) requirement, or to meet a Minimum Landscape Surface Ratio (LSR) requirement. Where such permanently protected green space is required, and where the land use is also permitted per the land use regulations of the applicable conventional zoning district (see Section 98-203, Table of Land Uses), the following table shall also be employed to establish land use regulations. All land uses listed in Section 98-203 but not listed in this Section are prohibited in permanently protected green spaces.

Section 98-206 Detailed Land Use Descriptions and Regulations

The land use categories employed by this Chapter (particularly Sections 98-203 and 98-204) are defined in this Section. Land uses which are not listed in this Chapter are not necessarily excluded from locating within any given zoning district. Section 98-911 empowers the Zoning Administrator to make interpretations on matters regarding specific land use proposals which are not addressed by this Chapter.

1. (1) Residential Land Uses

   (a) Conventional Residential Development

   Description: This land use includes, but is not limited to, all residential developments which do not provide permanently protected green space areas. Property which is under common ownership of a property owners’ association is permitted, but is not a required component of this type of development. Up to 10% of a Conventional Residential Development’s Gross Site Area (GSA) can contain natural resource areas which must be protected (or other permanently protected green space areas), without a reduction in Maximum Gross Density (MGD). (See note (1)(f) below.)

   2. Conditional Use Regulations: {SR-4, TR-6, MR-8, NO, NB}

   (b) Cluster Residential Development

   Description: This land use is a residential subdivision that requires dwelling unit types which require smaller lots than conventional residential developments within the same zoning district. This lot size flexibility is provided because the provision of sound neighborhood design principles results in a community character which is consistent with such Conventional Residential Developments. (See note (1)(f) below.)

   1. Permitted by Right: Not applicable.
   2. Conditional Use Regulations {CR-5ac}:
     a. Development clusters shall be located so as to blend with adjacent residually zoned areas to the greatest extent possible.

Description: This land use is a form of residential development designed to accommodate institutional residential uses, such as retirement homes, nursing homes, convents, and dormitories (see Section 98-206(3)(f)). No individual lots are required, although the development shall contain a minimum of 800 square feet of gross site area for each occupant of the development. A minimum of 30% of the development's Gross Site Area (GSA) shall be held as permanently protected green space. (See note (1)(f) below.)

1. Permitted by Right: Not applicable
2. Conditional Use Regulations {MR-8, NO, PO, NB, PB, GB, CB}:

   b. Shall be located with primary vehicular access on a collector or arterial street.
   c. No access shall be permitted to a local residential street.
   d. Applicant shall provide off-street passenger loading area at a minimum of one location within the development.

Description: This land use is a form of residential development which is exclusively reserved for individually sold lots containing mobile home units. Each of the lots and mobile home units must meet the requirements for mobile homes listed in Section 98-034 of this Chapter. Under this development option, approximately 10% of a development’s Gross Site Area (GSA) can contain natural resource areas which must be protected (or other permanently protected green space areas), without a reduction in Maximum Gross Density (MGD). (See note (1)(f) below.)

Each of the lots and mobile home units must meet the requirements for mobile homes listed in Section 98-034 of this Chapter. Under this development option, approximately 10% of a development’s Gross Site Area (GSA) can contain natural resource areas which must be protected (or other permanently protected green space areas), without a reduction in Maximum Gross Density (MGD).
